Please help us stop the NAB's Petition #04-160. My wife and I are both over the road truck drivers and we use our XM Radio for work everyday. We need it to stay the way it is. We use the weather and traffic reports to plan our day. With the XM the way it is now if there is bad weather or traffic ahead of us we can get better info off of the XM than we can on local stations. That lets us reroute around traffic and weather. Please help us stop 04-160. XM radio is the best thing to happen to radio and it is a very need tool for people like us that travel everyday for our lively hood. Thank you.
